DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 10, 12, 14-16, 18, 25, and 26 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Cooper (3,792,690). Note an oxygen separation system 13, an enriched oxygen stream connected to a first suction source including intake manifold vacuum and compressor or air pump 39, and a second nitrogen enriched stream, which is input to an exhaust system 48 (see Figure 3). It would have been obvious, if not inherent, that a second suction source such as the exhaust stream or an air pump would move the nitrogen flow into the muffler 48. Otherwise, the system would not function properly.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 13 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cooper (3,792,690). Cooper shows everything except the first suction source comprising a mechanical pump, and an air filter. An air pump and a mechanical pump

are alternative equivalents known for the same purpose. Thus, it would have been obvious to substitute a mechanical pump for an air pump (the air pump being cited in claim 12). In addition, it would have been an obvious matter of design choice to utilize an air filter, since such components are routinely utilized in the engine art to prevent contaminants from entering the engine.

Allowable Subject Matter

Claims 2-9, 11, 17, 19, 20, and 22-24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
